## PROFILE

As a seasoned developer, I thrive on building cutting-edge software solutions and bringing ideas to life. With a passion for learning and enhancing my craft, I stay at the forefront of the latest technologies. My collaborative approach and strong communication skills enable me to seamlessly integrate with teams and exceed expectations.

## EMPLOYMENT HISTORY

### Senior Backend developer, Shipwell.com                 Remote

Apr 2023 — Nov 2023

As a Senior Backend Developer at Shipwell, I designed, optimized, and maintained FastAPI services within a semi-monolithic architecture. My role involved collaborating with a multi-country team to enhance platform performance, reduce shipping delays, and ensure secure, scalable operations.

### Senior Backend developer, conkiwi.com                 Remote

Jan 2022 — Present

As a Backend Developer at Kiwi, a fintech company, I created a money disbursement system processing 5 million MXN daily, worked in an agile/scrum environment, and collaborated with a multi-continent team across different time zones.

### Senior Backendr Developer, Voxie                 Remote

Sep 2020 — Jan 2022

At Voxie, as a Backend Developer, I create internal web applications with a creative and innovative mindset. I work with multi-continent teams following the SCRUM methodology to ensure timely delivery of solutions.

### Senior Backend Developer, Suggestic.com                 Remote

2016 — Sep 2020

As a Backend Developer at Suggestic, I design and implement a subscription system for premium users and work with the AI team

to provide personalized recommendations. My tech stack includes Python, Django REST/GraphqI, ElasticSearch, PSQL, Scrapy, Stripe API, and Kubernetes in GCP for scalability and reliability.

### Co-founder / CTO, Sillymatter.com          Mexico City

2014 — 2016

As the CTO of SillyMatter, a digital marketing consulting agency, I lead the technical direction of the company, oversee the development of key projects, and implement a SCRUM methodology.

With my expertise in Python, Django REST, and PSQL, we have built a scalable and reliable platform for Natura consultants to track their development progress. Our infrastructure is deployed on DigitalOcean VPN and Heroku, ensuring security and availability.

I also train and coach junior developers to foster their growth and development.

### Lead Developer, IOrganizacional          Mexico City

2014 — 2015

As a lead developer at IOrganizacional, a software development company focused on projects for Mexico's judicial system, I designed and led the development of two major projects. My tech stack included Python, Django REST, and AngularJS, and I deployed on Heroku and install-on-site for scalability and reliability.

I also assisted with recruitment and training, monitored productivity, and led a team of 2 senior developers, 3 juniors, and 1 QA.

### Backend Developer, Ironbit.mx          Mexico City

Feb 2014 — Oct 2014

As a backend developer at Ironbit, a software development company, I developed a web-based music player for businesses, added geo-location functionality to a project, and maintained and upgraded legacy code.

My tech stack included Python, Django REST, and AngularJS, which allowed me to build scalable and robust web applications.

### Full Stack Developer / Lead Developer, Cepdi.mx          Mexico City

2013 — 2014

As a lead developer at Cepdi, a company with government permission to make official digital invoices for Mexico's treasury, I designed and implemented a new invoice system for Grupo Angeles Hospitales.

I also laid the foundation for a web application that allowed clients to manage their invoices efficiently. My tech stack included Python, Django REST, AngularJS, and a dedicated server to ensure reliable performance and security.

Additionally, I led a team of 3 junior developers and 1 QA, ensuring efficient collaboration and high-quality results.

### PHP Developer, happeningnm.com

Mexico City

2011 — 2013

As a developer at HappeningNM, a marketing consulting company, I animated the product tree using JavaScript and developed the main company page.

My tech stack included PHP with CakePHP version less than 1.5 and jQuery for dynamic front-end development. I deployed on shared hosting for cost-effective and accessible hosting solutions.

These contributions helped to improve the overall functionality and aesthetics of the website, ultimately driving better user engagement and business results.

## EDUCATION

### Diplomado, UAEM

Cuernavaca

Feb 2020 — Jul 2020

Data analysis and machine learning with Python

### Bachelor, UVM Coyoacan

Mexico City

2010 — 2016

Computer Systems and Administration
